

CLAIMS

What I claim as my invention is :

1) This invention is a new idea and the new way , The specific property is that the intention of this invention is to help doctor to avoid the accident happen in the surgical operation .

2) This invention is a new idea and the new way , The specific property Is that the intention of this invention is to protect patient from accident injury in the surgical operation .

3) This invention is a new idea and the new way , The specific property is that for this purpose (according to claim 2 wherein said) let patient to know which inward organs of his (her) body has been cut in the surgical operation .

4) This invention is a new idea and the new way , The specific property is that for this purpose (according to claim 1 wherein said) to looking for various related methods and making various new appliances and new products , which are used for completed these new idea and the new way according to claim 1 wherein said .

5) This invention is a new product [Fig. 1] (which is one kind of the various new methods and the various new appliances and products , according to claim 4 wherein said) , The specific property is that is a

new use of the electronic image storage device , which consists of a lens of video camera , video cassette recorder and television through a cable , and this product is specifically designed for use as a new kind of implement to observe the surgical operate process , which the doctor does to patient , and to record it , this invention is connected with the surgical operation and the electronic image storage device .

6) This invention is a new product [Fig . 2] (which is one kind of the various new methods and the various new appliances and products , according to claim 4 wherein said) , The specific property is that is a new use of the electronic image storage device , which consists of a lens of video camera , computer with CD – recorder (such as CD – RW , DVD – Recordable , DVD – Rewritable , - - -) , and the monitor through a cable , and this product is specifically designed for use as a new kind of implement to observe the surgical operate process , which the doctor does to patient , and to record it .

7) This invention is a new product [Fig . 3] (which is one kind of the various new methods and the various new appliances and products , according to claim 4 wherein said) , The specific property is that is a new use of the electronic image storage device , which consists of a lens of video camera with infrared Light emitted device , and the television with video cassette recorder through a cable (or transmitter by wireless) , this product is specifically designed for use as a new kind of implement to observe the surgical operate process , which the doctor does to patient , and to record it .

8) This invention is a part of the new product (according to claim 5 wherein said) , The specific property is that is a new use of the lens of video camera , this product is specifically designed for use as a new kind of implement to observe the surgical operate process , which the doctor does to patient .

9) This invention is a part of the new product (according to claim 7 wherein said) , The specific property is that is a new use of the lens of video camera with infrared Light emitted device , this product is specifically designed for use as a new kind of implement to observe the surgical operate process , which the doctor does to patient .

10) This invention is a part of the new product (according to claim 7 wherein said) , The specific property is that is a new use of the other various kind of lens of video camera with any function , this product is specifically designed for use as a new kind of implement to observe the surgical operate process , which the doctor does to patient .

11) This invention is a part of the new product (according to claim 5 wherein said) , The specific property is that is a new use of the various video cassette recorder , this product is specifically designed for use as a new kind of implement to observe the surgical operate process , which the doctor does to patient , and to record it .

12) This invention is a part of the new product (according to claim 5

wherein said) , The specific property is that is a new use of the various video cassette tape , this product is specifically designed for use as a new kind of implement to observe the surgical operate process , which the doctor does to patient , and to record it .

13) This invention is a part of the new product (according to claim 6 wherein said) , The specific property is that is a new use of the various CD – Recorder (such as the computer with CD – RW , DVD – Recordable , DVD – Rewritable , - - -) , this product is specifically designed for use as a new kind of implement to observe the surgical operate process , which the doctor does to patient , and to record it .

14) This invention is a part of the new product (according to claim 6 wherein said) , The specific property is that is a new use of the CD – disk , this product is specifically designed for use as a new kind of implement to observe the surgical operate process , which the doctor does to patient , and to record it .

15) This invention is a part of the new product (according to claim 6 wherein said) , The specific property is that is a new use of the other various CD – disk (such as the CD – Recordable disk , The CD – Rewritable disk , ---- etc) , this product is specifically designed for use as a new kind of implement to observe the surgical operate process , which the doctor does to patient , and to record it .

16) This invention is a part of the new product (according to claim 6

wherein said) , The specific property is that is a new use of the other various CD - disk (such as the VCD , MP3 , DVD , JPEG , Picture CD , MPEG - - - etc) , this product is specifically designed for use as a new kind of implement to observe the surgical operate process , which the doctor does to patient , and to record it .

17) This invention is a part of the new product (according to claim 5 wherein said) , The specific property is that is a new use of the various kinds of television , this product is specifically designed for use as a new kind of implement to observe the surgical operate process , which the doctor does to patient , and to record it .

18) This invention is a part of the new product (according to claim 7 wherein said) , The specific property is that is a new use of the various kinds of television with any function (such as with video cassette recorder , - - -) , this product is specifically designed for use as a new kind of implement to observe the surgical operate process , which the doctor does to patient , and to record it .

19) This invention is a part of the new product (according to claim 6 wherein said) , The specific property is that is a new use of the various kinds of monitor , this product is specifically designed for use as a new kind of implement to observe the surgical operate process , which the doctor does to patient , and to record it .

20) This invention is a new product (as a new use of the electric

circuit) according to claim 4 wherein said , The specific property is that is a new use of the electric circuit [Fig . 4] , which is contained by the switch , lamps , sounders , cell , and the cable (and the other parts of any functions) , this electric circuit is specifically designed for use as a new kind of implement to inform the doctor and surgical operator (if the mistakes or the wrong operate was happen) and to correct it immediately , so it can be avoid that the accident of surgical operation could be happen .
